### GENERAL COMMENTS-

I recently took the tour to the Yucca Mountain Site. Before going to the site, I was opposed to the waste being disposed in Nevada. After viewing the site I now think the site is a good one.

My one concern is transporting the material to Nevada. Since we spend time in both Pa and NV, we would be affected at both locations.

My other concern is how the material is being protected now as it waits to be sent to storage.

Yucca Mountain is the site being developed but originally there was to be a site in the eastern portion of the United States. Are sites in the east being considered?

As you can see there are still many questions to be answered.
